

To find Truffles

During your stay in Burgundy, La Cimentelle organizes in its gardens and in the forest a Ucinatum truffle hunting session.

Looking for truffles in Burgundy

First of all, the Burgundy truffle, known as "Tuber Ucinatum" is the most spreaded in Europe.

In fact, the truffles are mushrooms that you can find in the forest, in calcareous soil, around trees such as oak, birch, hazel or hornbeam. It has a round or complex shape and its diameter can vary from 1 to 10 cm, its flesh is chocolate-coloured and ribbed by white veins.

"Come and taste the unrivalled undergrowth of Burgundy !!!.."

More precisely, you will be able to savour some truffles during your dinners at La Cimentelle if the season allows it. Nevertheless, we can organize truffle hunting sessions in our domain.

Now we can also look for black Mélanosporum truffles.

Truffle hunting sessions : 4 persons Min. 50 €/person

Including wine and truffle tasting sessions. Make sure you have boots and the required equipment to protect you from rain.

Availability depends on seasons between october and december.

Marché aux truffes à Noyers-sur-Serein – Vézelay – Avallon au mois d'Octobre et Novembre.
